

Questions

Also, is there anymore details in the draft site plan than what is included in the scope of work package, if so, how may we access the draft site plans?

I apologize, I will load the draft site plan now.

it is stated that the Town has a draft site plan, but a new site plan will be needed for permitting with updated or missing information complete. Will the awarded contractor be responsible for providing the new site plan?

Yes, the contractor will be responsible for providing a new site plan, if necessary, for any permitting needs. The contractor will also be responsible for obtaining permit for the Town, OCRM, and any others that may be needed.
